Introduction

Lenovo is a global technology powerhouse, ranked at 217 in the Fortune Global 500, and a \$62 billion revenue company that employs 77,000 people worldwide focused on delivering “smarter technology for all”. Building on our success as the world’s number one PC maker, Lenovo is expanding its research into growth areas to advance “New IT” technologies (client, edge, cloud, network, and intelligence). Lenovo is determined to improve our planet and society by minimizing Lenovo’s environmental impact, promoting social equity through its business and via the Lenovo Foundation, and ensuring ethical, responsible, and transparent operations. This transformation together with Lenovo’s world-changing innovation is building a more inclusive, trustworthy, and sustainable digital society for everyone, everywhere. To find out more visit [About the Company | Lenovo US](#) to read about the latest news via our [StoryHub](#).

- Lenovo’s Intelligent Devices Group (IDG) offers a wide selection of smart devices and solutions, ranging from smartphones to PCs to software, both for everyday consumers and for businesses.

- Lenovo's Infrastructure Solutions Group (ISG) is accelerating the new era of IT and driving intelligent transformation with innovative, efficient and AI-ready infrastructure that goes beyond the data center to help businesses unlock the power of their data and help solve humanity's greatest challenges.
- Lenovo Solutions and Services Group (SSG) brings together all of Lenovo's IT solutions and services across PC, infrastructure, and smart verticals, including attached services, managed services and As a Service (AaS) offerings.
- Lenovo's Capital and Incubator Group is a global technology industry fund focused on creating a smart ecosystem through strategic investments, including IoT, edge computing, big data, cloud, artificial intelligence (AI), and smart vertical solutions.

Lenovo is devoted to conduct socially, environmentally, and ethically responsible sourcing and responsible business practices with our products, employees, sites, and suppliers. A full overview of Lenovo including our products, culture, and management as well as our Conflict Minerals policy can be found on [About the Company | Lenovo US](#) or [Lenovo Sustainability Resources | Lenovo US](#).

Conflict Minerals Policy: [Lenovo's Policy on Responsible Sourcing of Raw Materials](#)

Section 1 - Conflict Minerals Disclosures

In 2023, Lenovo utilized the internationally recognized [OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas](#) framework for our conflict minerals efforts.

Lenovo also utilized industry standard protocols for responsible sourcing programs to help drive a common industry approach complementing hundreds of other major international company's efforts, to optimize for a more efficient and effective due diligence effort and to address key non-governmental organization's expectations. The protocols include:

[Responsible Business Alliance](#) (RBA) Programs

- ✓ [Responsible Minerals Initiative](#) (RMI)
- ✓ [Conflict Minerals Reporting Template](#) (CMRT) & [Extended Minerals Reporting Template](#) (EMRT)
- ✓ [Responsible Minerals Assurance Process](#) (RMAP)

Lenovo is committed to working towards sourcing only minerals from conflict-free compliant sources that are audited and verified by recognized independent bodies. Our efforts are summarized in this Specialized Disclosure and described in further detail in the Lenovo Conflict Minerals report.

We have concluded in good faith that during 2023 Lenovo:

- a) Based on the results of RCOI and good faith efforts, Lenovo did have reason to believe that certain conflict minerals contained in our 2023 products may have originated in the Covered Countries and may not have been from recycled or scrap sources.
- b) Therefore, Lenovo conducted Due Diligence on the source and custody of our conflict minerals in our products and created a Conflict Minerals Report with the required elements.

- c) It is important to note that Lenovo, while complying with the Dodd-Frank ruling across our operations, had exceeded the requirements thereof in three regards:
 - i. Lenovo is not subject to the ruling requirements and has not filed reports to the Security Exchange Commission in 2023 or any prior year.
 - ii. While only less than half of our suppliers based on procurement spending must legally comply with Dodd-Frank, we contractually required due diligence with suppliers and all their upstream suppliers.
 - iii. We complied with the ruling even though most of Lenovo’s procurement operations are not “contract to manufacture” and are more purchase complete/final assembly and as such are not subject to the ruling. Much of the procurement spend was for industry standard parts not manufactured specifically for Lenovo. The majority of our procurement and supplier contracts do not specify parts, ingredients, or components as we did not specify contract terms that directly related to manufacturing of the product. We only stipulated prices, warranties, legal and other standard terms.
